

# Auto-Fill ESG — The Supplier's Shield

Stop losing contracts to ESG paperwork.

Deliver audit-ready supplier answers in days, not weeks.

---

## Why Suppliers Are Being Quietly Delisted

Across global supply chains, ESG questionnaires are no longer a compliance exercise — they are a **revenue gate**.

Buyers now require suppliers to pass ESG assessments before:

- onboarding,
- contract renewals,
- or purchase order approvals.

For suppliers, this has created a silent failure point:

- **Buyer ESG questionnaires now gate revenue, not compliance**
- **Manual responses take weeks**, miss deadlines, and fail audits
- **One missing or untraceable citation can invalidate the entire assessment**
- **External consultants charge \$15,000–\$20,000 per cycle**, per buyer — and still rely on manual processes

The result: qualified suppliers lose deals, get delayed, or are quietly deprioritized — not because they failed ESG standards, but because they couldn't respond fast and verifiably enough.

---

## Auto-Fill ESG Automatically Completes Buyer Questionnaires

Auto-Fill ESG is built specifically for **suppliers** who need to respond to buyer ESG portals accurately, quickly, and defensibly.

**How it works:**

1. **Upload your existing documents**  
Policies, certifications, audits, procedures, reports, and disclosures.
2. **AI auto-fills buyer ESG questions**  
The system maps buyer questions (EcoVadis, Walmart, OEM portals, etc.) to your internal documents.

### 3. **Every answer is citation-backed and exportable**

Each response includes traceable source references, ready for audit review.

**Bold truth:**

**No citation. No answer. Fully auditable.**

---

## **What Makes Auto-Fill ESG Different**

Most ESG tools generate summaries.

Auto-Fill ESG generates **defensible answers**.

### **Split-Screen Verification Model:**

- **Left:** Buyer ESG question (e.g. EcoVadis, Walmart, OEM portal)
- **Right:** AI-generated answer with highlighted source citations

Auditors, buyers, and internal teams can:

- Click any answer
- Trace it directly to the original source document
- Verify accuracy instantly

**Result:** Faster approvals, fewer follow-ups, and dramatically reduced audit risk.

---

## **Charter Partner Offer — Early Shield**

**\$6,000 / Year (Founders Early Access)**

This is not a demo. This is a **real deliverable**.

### **Included:**

- Completion of **one real buyer ESG questionnaire**
- Audit-ready, citation-backed export
- Priority onboarding and ingestion
- Direct implementation support during your first cycle

**Renewal:** \$9,000 / year after Year 1

---

## **The Contract Protection Guarantee**

**If Auto-Fill ESG fails to deliver one completed, audit-ready buyer ESG questionnaire within 21 calendar days, your full annual fee is refunded.**

No fine print.

No partial credits.

Your risk is eliminated.

---

## **Who This Is Built For**

- ✓ Tier-1 and Tier-2 suppliers
  - ✓ Companies responding to buyer ESG portals and RFPs
  - ✓ Operations, Compliance, Quality, and Procurement teams
  - ✓ Suppliers who cannot afford delays, rejections, or audit failures
-
